

We're still here for you!

Like many of our clients and partners, the COVID 19 pandemic has had a significant impact on how we conduct day to day operations here at Wallace. As the situation quickly evolved during the month of March, we knew that we had to take decisive action to ensure the safety of our employees. So within the span of a few days, we developed and implemented our work from home policy. As we implemented such a quick and dramatic change, we weren't sure how our network or our procedures would hold up. It was very inspiring to watch our staff quickly develop this new policy and then implement solutions to problems that we hadn't anticipated. Without such a dedicated and innovative group of professionals, we could have never pulled this off. We are happy to report that there were no significant interruptions to our business continuity and we hope that none of our clients even noticed this change.

As you all know, this situation continues to evolve. We are seeing local and state governments starting to lift restrictions and we will alter our policies accordingly. We are committed to continuing to provide uninterrupted service to our clients while ensuring the health and wellness of our Team.

Meet the newest additions to our TEAM!

Brad Adcock **Project Coordinator in Training**

Brad is a Mississippi native and joins the Wallace Team in our Jackson, MS office location. Brad comes to Wallace with over 20 years of design experience working for an Architectural Firm that also specialized in multi-family housing design, specifically LIHTC developments. Brad's extensive multi-family specific experience has allowed him to hit the ground running at Wallace.

Heather Imler **Project Coordinator in Training**

Heather has a hands on background in both Design and Construction and joins the Wallace Team in our Columbia, MO office location. Heather's recent past experiences include her leading a Construction Company she started at the Lake of the Ozarks. Her knack for understanding construction detailing and her forward approach to BIM style drafting makes her a welcome addition to the Wallace Team.
